

NEW

NARROW WALL

PRIER's new P-623/P-628 commercial hydrant is built for interior walls and great for stadiums, indoor pools, and other large recreational areas. The P-623 is a single-temperature valve, while the P-628 features both hot and cold valves. Our new Narrow Wall comes with a lockable, stainless steel box that makes both vertical and horizontal installation easy.

- Integral stop allows for service without shutting off entire water system
- ASSE code approved vacuum breaker
- Serviceable from front of unit
