

Build With Purpose

P-360 SANITARY BURY HYDRANT

The P-360 Sanitary Freezeless Bury Hydrant uses a piston style water displacement system in the reservoir. It does not require special maintenance or winterization. It will not drain into the surrounding soil which means contaminated water will not seep into the hydrant. The P-360 is great for places like campgrounds, boat docks, RV parks, and gas stations.

- Bury depths from 1' to 7'
- Flows 10 GPM at 25 PSI Differential
- Stringent safety and performance requirements for ASSE 1057 approval
- NSF 372 lead free
- Freezeless — no winterizing required and drains with the hose attached
- Fully serviceable above ground
- No contamination from surrounding soil
- Heavy duty ductile cast iron head is three times stronger than regular cast iron
- Lockable lever handle prevents unauthorized use
- Bucket catch on spout
