

P-754

COMMERCIAL

HOT & COLD

HYDRANT

Build With Purpose

Borrowing the quality and function of the C-634 and the temperature control technology of the P-118, the P-754 offers the best of both worlds for commercial applications with tempered water needs.

- Single control temperature dial
- High flow rate: 16 gpm at 25 PSI differential
- Heavy pattern cast brass with satin nickel plated finish
- Heavy-duty brass piping with threaded and sealed joints for long life
- Included mounting backplate assists with easy installation
- Patented PRIER “triple seal” positive shut-off system
- Check valves prevent inlet cross-contamination and thermal migration to ensure precise temperature control
- ASSE 1052 approved double-check backflow preventer and vacuum breaker
- Pressure rated to 125PSI and temperatures up to 140°
- P-754BX1 sold separately
